

Handle and blade compatibility guide

Pistol grip handles

New catalogue number 50368

The S-160 handle will fit any screw-fitting z-saw blade but is the perfect choice for these blades:

- S-225 universal
- S-265 universal
- S-300 universal
- S-333 universal

New catalogue number 50366

The PS-130 wooden pistol grip handle shown here is intended for use with the following pruning type blades:

- PS-170 pruning
- PS-200 pruning fine
- PS-200 pruning medium
- PS-230 pruning coarse

Catalogue number 50356/7/8/9

The S-117 handle is available in 4 colours as shown. It is best with the S-175 series of blades but will of course fit any screw-fitting z-saw blade

Catalogue number 50351/2

The S-155 handle, whilst able to take any screw-fitting blade, is intended for use with the S-270 bamboo and S-270 framing blades.

Catalogue number 50321/2/3

The three different coloured H-126 handles can be used in combination with the following blades only:

- H-120 siding
- H-180 utility tapered
- H-240 utility
- H-240 utility tapered
- H-240 paiman

Catalogue number 50325

This handle, the H-146 SH (SH meaning short holder), can only be used with the H-300 utility blade.

Catalogue number 50324

The H-146 LH handle is for these blades:
H-250 rip,
H-250 cross,
H-250 hardwood,
H-250 universal,
H-265 cross,
H-265 universal,
H-265 cross convex,
H-270 bamboo.

Catalogue number 50320

The H-150 wooden handle is designed exclusively for the H-273 framing blade.

Straight handles

Catalogue number 50301

The H-190 handle shown here will accept the H-150 bamboo, Dozuki and piercing blades.

Catalogue number 50304

This handle, the H-270 straight, is for the H-240 range of blades: panel wide, panel narrow, piercing, Dozuki and Dozuki wide.

Catalogue number 50302

The H-240 straight LH handle will take the following blades:
H-120 siding, H-180 utility tapered, H-240 utility, H-240 utility tapered & H-240 paiman.

Catalogue number 50303

The H-240 straight SH handle takes exactly the same blades as the H-240 straight LH: H-120 siding, H-180 utility tapered, H-240 utility, H-240 utility tapered & H-240 paiman.

Catalogue 50308

This is the H-300 puff handle, designed to blow sawdust away from your marked cutting line. It can be used with these blades: H-250 rip, H-250 hardwood, H-250 cross, H-250 universal, H-265 cross, H-265 cross convex, H-265 universal and H-270 bamboo.

Catalogue 50309

Catalogue 50311

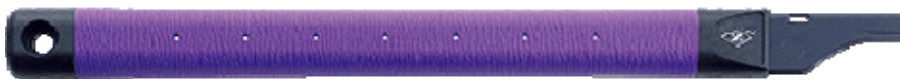

Catalogue 50310

Catalogue 50306

These H-300 handles are 300mm long and are designed to fit the same blades as the puff handle: H-250 rip, H-250 hardwood, H-250 cross, H-250 universal, H-265 cross, H-265 cross convex, H-265 universal and H-270 bamboo.

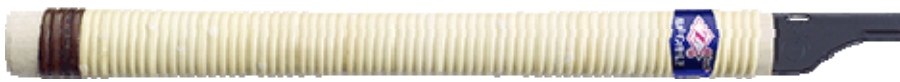

Catalogue 50313

Catalogue 50314

Catalogue 50312

Catalogue 50307

These 330mm long handles are for use with the H-300 rip, H-300 cross convex, H-300 universal and H-333 framing blades.

Catalogue number 50344

The S-150 handle is ideal for the S-145 flush-cutting blades, both single- and double-edged.

Catalogue 50344

Catalogue 50343

Like all screw-fitting handles, these will fit any screw-fitting z-saw blade. They are designed primarily for use with the S-250 double-edged blade, however.

Folding handles

Catalogue 50331

The H-210 folding handle can only be used with the Oricco H-210 pruning blade.

Catalogue 50332

The H-240 folding handle can only be used with the Oricco H-240 pruning blade.

Catalogue 50333

The H-270 folding handle can only be used with the Oricco H-270 pruning blade.

Catalogue 50337

This P-210 folding handle can be used with the P-210 fine and P-210 coarse blades.

Catalogue 50338

This P-240 folding handle can be used with the P-240 carpentry and P-240 coarse blades.
