

## PS-200 pruning fine

Blade 50061, handle 50366. Was 17102.

Designed for pruning deciduous fruit trees

### SPECIFICATION

PITCH	BLADE LENGTH	BLADE THICKNESS	KERF
2.4mm (10TPI)	200mm	0.6mm	0.76 mm

### FEATURES

- High quality sharp teeth (impulse hardened) designed for long-lasting great performance
- Interchangeable blade style saves you money.
- Nickel-plated saw blade for rust prevention.
- Belt-mountable sheath (optional extra) to protect the saw.

### REPLACEMENT OF SAW BLADE

#### Detaching & attaching blade

- Loosen the screw with coin or screwdriver, without undoing it completely, and pull the blade out from the handle.
- Insert the blade, and tighten the screw to fix the blade firmly.

#### CAUTION:

Since the saw teeth are very sharp, we recommend that you wear gloves or wrap the blade with something (a cloth or towel or its cardboard sleeve) when replacing the blade.
