

S-175 bamboo and plastics

Blade number 50033, handle 50356/7/8/9. Previously 30016.

Designed for cutting bamboo, siding board, lead tube, polyethylene pipe, plastic etc.

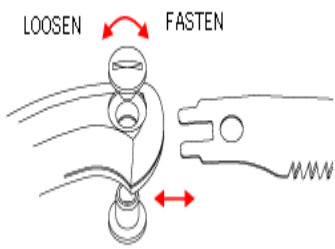

SPECIFICATION

PITCH	BLADE LENGTH	BLADE THICKNESS	KERF
1.50mm	180mm	0.5mm	0.8mm

FEATURES

- Screw-locking style is simple and safe.
- Interchangeable blade is much more economical than built-in style.
- High quality sharp teeth are designed for long-lasting great performance.
- Nickel-plated saw blade for rust prevention.
- Fine teeth minimise splitting and leave an incredibly clean cut surface.

REPLACEMENT OF SAW BLADE

Detaching blade	Attaching blade
	<ul style="list-style-type: none">● Loosen the screw with coin or screwdriver, and pull the blade out from the handle.● Insert the blade, and screw to fix the blade firmly.● Check the screw and fixed position of saw blade

CAUTION:

Since the saw teeth are very sharp, we recommend that you wear gloves or wrap the blade with something (a cloth or towel or its cardboard sleeve) when replacing the blade.
