

S-210 Compass saw

Catalogue number 50110 (blade) and 50357 (handle). Previously 30209.

Designed for cutting tight curves, circles, and other geometric shapes in sawn wood, plywood, laminated wood, composite board, plaster board etc.

※One pre-drilled hole is needed if your cutout is not at the edge of the workpiece.

SPECIFICATION

PITCH	BLADE LENGTH	BLADE THICKNESS	KERF
1.60mm	210mm	0.90mm	1.30mm

FEATURES

- Screw-locking style is simple and safe.
- Interchangeable blade is much more economical than built-in style.
- High quality sharp teeth are designed for long-lasting great performance.
- Nickel-plated saw blade for rust prevention.

REPLACEMENT OF SAW BLADE

Detaching blade & Attaching blade

- Loosen the screw with coin or screwdriver, and pull the blade out from the handle.
- Insert the blade, and screw to fix the blade firmly.

CAUTION:

Since the saw teeth are very sharp, we recommend that you wear gloves or wrap the blade with something (a cloth or towel or its cardboard sleeve) when replacing the blade.
