

S-90 compass fine

Part numbers 50108 (blade) and 50358 (handle). Previously 30206.

Designed for cutting tight curves, circles, and other geometric shapes in sawn wood, plywood, laminated wood, composite board, plaster board etc.

※One pre-drilled hole is needed if your cutout is not at the edge of the workpiece.

SPECIFICATION

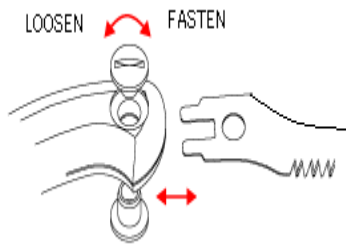

PITCH	BLADE LENGTH	BLADE THICKNESS	KERF
1.60mm (16 TPI)	90mm	0.90mm	1.36mm

FEATURES

- High quality sharp teeth are designed for long-lasting great performance
- The blade is Nickel-plated for rust prevention.
- Interchangeable blade style saves you money.

REPLACEMENT OF SAW BLADE

Detaching blade

Attaching blade

- Loosen the screw with coin or screwdriver, and pull the blade out from the handle.
- Insert the blade, and screw to fix the blade firmly.
- Check the screw and fixed position of saw blade

CAUTION:

Since the saw teeth are very sharp, we recommend that you wear gloves or wrap the blade with something (a cloth or towel or its cardboard sleeve) when replacing the blade.
